A dark blue diagonal gradient bar that starts from the bottom left corner and extends towards the top right corner, covering the lower half of the slide.

Beyond Bottles

- Alcohol addiction stands as a significant global concern and remains a leading contributor to preventable fatalities in the United States.
- Our study primarily seeks to inspire individuals grappling with alcohol addiction to break free from its grip and embrace a path toward wellness.
- Existing applications predominantly focus on reactive measures and profit-driven motives, whereas our app adopts a proactive continuum care strategy. This includes persuasive techniques, discussion-oriented features akin to peer networks, and fostering self-control.
- We integrate token and reward systems to incentivize positive behaviors and progress towards a healthier lifestyle.

A) Summarize the progress

- **A list of action items that were completed:**
 - Finalized the tech stack
 - Finalized the app features
 - Creating database design
 - Coming up with the workflow
 - Research about alcohol
 - Criteria for leaderboard points

A) Summarize the progress

- **A list of action items that were committed to since the previous meetup**
 - Setting up the MySQL database
 - Setup a flask project
 - Figure out how to create API's
 - Working on the Instructor feedback - To find the broader range of recovery tools
- **A list the missing milestone (N/A)**
- **The current milestone in progress with the target completion date**
 - Backend and Database Implementation (for user management, authentication & registration) - 3/2

B) Address the product issues based on the feedback from your colleagues, and TA.

- Classify them into the following groups.
 - Void:
 - Partner Feedback - ChoreTracker
Feature to discussion posts -> Feature to upvote and downvote a post is already planned
 - Bug: N/A
 - Enhancement:
 - Short-Term:
 - Make some value to the discussion -> came up with the feature of upvote and downvote in the discussion (Team GitInsight)
 - Inappropriate posts -> came up with adding a moderator (eg: admin) who can edit/delete the comments (Team GitInsight)
 - Long-Term:
 - Showing the posts based on the popularity & Completely Ignoring Inappropriate posts (Team GitInsight)

Thank You
